

Company profile

Yicozoo Energy Technology Co.,LTD is specialized in manufacturing laboratory consumable products. With 100,000 grade clean workshop. We have many years of experience in this field. Our products are widely used in laboratory, pharmacy, industrial, biology, education, scientific research and other fields. We are committed to providing every customer with better service and price.

Our main products are PCR, Centrifuge Tube, Cell Culture Series, Air Filter, Syringe Filter, Filter Paper, Filter Membrane, Autosampler vial, Pipette, Pipette Tips, Cellulose Extraction Thimble, Diaphragm Vacuum Pump, Vacuum Filtration System, Chromatographic Column, Solid Phase Extraction unit and so on.

We uphold the principle of quality first, services first, and honesty.

Cellulose Extraction Thimble

Product Introduction

1. Cellulose extraction thimbles are produced from high quality alpha cellulose cotton linter and have excellent mechanical strength and retention. Available in over 30 sizes, they are widely use in soxhlet extraction units providing a safe, convenient and efficient method of solvent extraction of solids and semi-solids, for air and waste gas analysis.
2. Made of the finest materials without any binding elements, which will guarantees reliable and replicable experiment results.
3. It is applied to Soxhlet Extraction.

Features

- ❖ Excellent mechanical strength and retention
- ❖ High fitting accuracy for all available extraction system
- ❖ Available in over 30 sizes to suit your application
- ❖ Designed to fit most commercially available Soxhlet extractors
- ❖ Suitable for temperatures up to 120°C (248°F)
- ❖ Without Binder
- ❖ Special size and specifications can be customized

Filter Paper(Qualitative Filter Paper)

Product Introduction

1. Qualitative filter paper uses high-quality cotton as raw material, and is refined by modern and unique papermaking technology and advanced papermaking equipment.
2. The product is used for general qualitative analysis and for filtering precipitation or suspended solids in solution.

Features

- ❖ Discs, Squares, Rolls are all available.
- ❖ Any size can be customized for qualitative filter paper, the minimum is 2mm.
- ❖ Our products are of reliable quality and stable performance.

Applications

- ❖ Qualitative analysis pretreatment.
- ❖ Used for precipitation and solid-liquid separation and purification.
- ❖ Qualitative chemical analysis in many fields such as chemical industry, metallurgy, pharmaceutical, mining, etc.

Filter Paper(Quantitative Filter Paper)

Product Introduction

1. Quantitative filter paper is made of the highest quality commercial cotton pulp as raw material, using advanced production and post-processing technology; its residual ash after burning is very small, and it has almost no effect on the analysis results, suitable for precise quantitative analysis.
2. Quantitative filter paper has formed a stable and reliable production process and inspection system to ensure product quality after years of production practice and technical research.

Features

- ❖ Discs, Squares, Rolls are all available
- ❖ Any size can be customized for quantitative filter paper, the minimum is 2mm
- ❖ Our products are of reliable quality and stable performance

Applications

- ❖ Precise quantitative analysis
- ❖ Liquid purification
- ❖ Analysis separation or air and water analysis
