Serving Human Health

Suzhou CellPro Biotechnology Co., Ltd.

Suzhou CellPro Biotechnology Co., Ltd. was established in 2018, specialized in the research and development, production and sales of high-end biomedical consumables.

CellPro is committed to providing global customers with high-quality consumables and customized services in Liquid Handling, Molecular Biology, Cell Culture, Immunotherapy, Biopharmaceuticals, etc.

CellPro currently has more than 400 employees, with plant of 50,000 m², 9,000 m² cleanroom of ISO Class 8, 5,500m² cleanroom of ISO Class 7, 1,800 m² GMP cleanroom and gained more than 80 patents.

R & D Driving

CellPro established a professional gene amplification laboratory, cell culture laboratory, microbiology laboratory, robotic tips compatible experiment laboratory, etc., which can conduct one-stop biological performance verification and integrated research and development of consumables, reagents and instruments.

Production Supporting

Advanced equipment, imported high-quality raw materials to ensure the stability of quality.

With 100+ Fully automated production lines. They are all used of FANUC, ARBURG, ENGEL, TOYO and other imported injection molding machines and Davis Standard extruders to escort production and production capacity.

Quality System

The products are certified by TUV ISO13485, ISO9001, ISO14001 and medical device products passed CE-MDR and FDA standard gained.

Customized Service

CellPro possess high-precision mold research and development center. CellPro is capacity for independently completing the whole process of product research and development, mold design and manufacturing, precision machining and plastic molding, process customization, biological verification, large-scale production. Externally, we can meet the needs of biomedical companies for new product development and customzid production.

Sales Service

CellPro has built a global distribution network.

Headquarters located in Suzhou, China.

Established North American sales center in the United States.

International sales center in Dubai, covering more than 50 countries and regions including Southeast Asia, South Asia, Europe, the Middle East, and North Africa. The establishment of an international warehouse and international logistics in Dubai has greatly improved the sourcing experience of our global customers and our service capabilities.

Pipette Tips

CellPro high quality pipette tips are universal fit, with high transparency and under GMP standard production. Low retention, filter are all optional. Ensure that you can choose any size that meets your requirements.

Features

- 100% virgin polypropylene
- Fully automated production lines
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Universal fit
- Smooth surface to ensure accurate pipetting

Applications

- Pipetting liquids
- Dispensing liquids
- Mixing liquids
- Filling plates and reaction vessels
- Filling gels for electrophoresis
- Phase extraction and removal of supernatants

10 µL Pipette Tips

P / N	Max Capacity/µL	Tip Format	Tip Color	Configuration

CLT Universal Pipette Tips

CLT universal pipette tips provide better performance in every way than universal type. The extra-long design of the tip makes it easier to use for almost any pipetting application and fits almost any brand of pipette in your lab. CLT represents quality, high performance and reliability.

Features

- 100% virgin polypropylene
- ISO-8 Cleanroom Production
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Universal fit

Applications

- Pipetting liquids
- Dispensing liquids
- Mixing liquids
- Filling plates and reaction vessels
- Filling gels for electrophoresis
- Phase extraction and removal of supernatants

RN Pipette Tips

Compatibility: Rainin LTS Series

Features

- Imported polypropylene (PP), USP Class VI standards
- Smooth inner wall, reduce liquid residue, ensure the accuracy of liquid suction
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Ultra-grinding & molding technology, release agent free
- Withstand temperature ranging from -80°C to 121 °C, stable performance under high temperature and high pressure
- Extra thin-wall design increase product flexibility and improve heat transfer efficiency

Tecan Robotic Tips

Designed for Tecan Platform.
Made of medical grade conductive polypropylene (PP), allowing capacitive liquid level detection.
Filter or without are all optional.

Features

- High performance
- Dispensing liquids
- Fully automated production lines
- Consistent pipetting accuracy and precision
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Compatibility:
Series: **Tecan Freedom EVO, Cavro workstation**

TCN MCA Pipette Tips

Imported polypropylene (PP) material, stable chemical properties, excellent chemical corrosion resistance. CellPro has independent mold design capabilities and mature injection molding technology to ensure good air tightness and adaptability of products. All single-use tips are designed, manufactured, tested and certified to guarantee reliable quality, and consistency in pipetting accuracy and precision helps you achieve the best results.

50µL TCN MCA Pipette Tips

200µL TCN MCA Pipette Tips

Applications

- Adapted to TECAN MCA automatic workstations
- Imported polypropylene (PP) material , high light transmission
- The inner wall is smooth, pipetting is precise, and the seal and compatibility are good
- ISO-8 Cleanroom Production
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free

PerkinElmer Robotic Tips

Designed for PE Platform.
Made of medical grade conductive polypropylene (PP), allowing capacitive liquid level detection.
Filter or without are all optional.
PE customized tip box with steady base.

Features

- High performance
- Dispensing liquids
- Fully automated production lines
- Consistent pipetting accuracy and precision
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Compatibility:
Series: **JANUS**
Models: **JANUS G3, JANUS G3 NGS Express, JANUS G3 BioTx Pro and Pro Plus**
Robotic arm: **Varispan**

Hamilton Robotic Tips

Designed for Hamilton Platform.
Made of medical grade conductive polypropylene (PP), allowing capacitive liquid level detection.
Filter or without are all optional.

Features

- High performance
- Dispensing liquids
- Fully automated production lines
- Consistent pipetting accuracy and precision
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Compatibility:
models: **Microlab VANTAGE, Microlab STAR, Microlab NIMBUS, Microlab Prep**
pipettes: **1000µL channel, 96 ultiprobe Head**

Beckman Robotic Tips

- Imported polypropylene (PP), USP Class VI standards
- Smooth inner wall, reduce liquid residue, ensure the accuracy of liquid suction
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Ultra-grinding & molding technology
- Withstand temperature ranging from -80°C to 121°C , stable performance under high temperature and high pressure
- Extra thin-wall design increase product flexibility and improve heat transfer efficiency

Features

- High performance
- Dispensing liquids
- Fully automated production lines
- Consistent pipetting accuracy and precision
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- Compatibility: **Beckman Biomek FX/NX, Biomek 4000, NAYO N96**

Robotic Reservoirs

CellPro offers single-well and multiple-well reagent reservoirs which are available in multiple formats for both manual and automated environments. All reservoirs are compatible with most automation workstations. Reagent reservoirs are manufactured with polypropylene for excellent chemical resistance.

Features

- DNase/RNase-free
- Low heavy metals content
- Good chemical compatibility
- Comply with standard ANSI/SBS
- Can be stored at temperatures as low as -80°C

Application

Fit 8-channel or 12-channel pipette or 8-channel, 12-channel, 96-channel and 384-channel automation workstations.

P / N	Wells	Channels	Type	Sterile	Configuration
819001	Multi	8-Channel Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819002	Multi	12-Channel Trough	Low Profile	No	5 pcs/pack, 10 packs/case

819004	Single	96-Bottom Trough	High Profile	No	5 pcs/pack, 10 packs/case
819005	Single	384-Bottom Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819016	Multi	4-Channel Trough	Low Profile	No	5 pcs/pack, 10 packs/case
819017	Single	1-Bottom Trough	Low Profile	Yes	1 pc/pack, 150 packs/case
819018	Single	1-Bottom Trough	Low Profile	No	5 pcs/pack, 10 packs/case

Reagent Reservoirs

Disposable reagent reservoirs are manufactured with polystyrene and fit all multichannel pipettors. Four pour-off corners and a sharp v-bottom to ensure maximum sample retrieval.

Features

- Extra-wide base adds rigidity and stability to reservoir, helping to avoid spills
- Pour-off spouts on all four corners reduce spillage when pouring reagents out of reservoir
- Graduations on inside wall enable quick measurement of remaining liquid
- 25 mL, 65 mL divided reservoir allows the pipetting of two different reagents

P / N	Capacity	Sterile	Configuration

PCR Tubes and Plates

Features

- Made of medical grade imported polypropylene (PP)
- Qualified injection molding technology and independent mold design technology
- Thin wall and uniform in thickness
- ISO-8 Cleanroom Production, DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free

96-Well PCR Plates

96-Well, flat top PCR microplate is designed to fit standard 96 well blocks. Ultra-thin and consistent wall thickness allows precise thermal transfer for optimum results. Can be sealed with 8/12 strip caps, or sealing film.

Features

- Suitable for 0.1 mL/0.2 mL thermal cycler blocks
- Application: PCR, qPCR/Real-Time PCR

96-Well PCR plates

P / N	Capacity/μL	Cut corner	Color	Skirt Style	Configuration

384-Well PCR Plates

384-Well PCR Plates are compatible with most 384-module PCR instruments and sequencing instruments, are suitable for high-throughput automated systems, and have notch at the A24&P24 position.

Features

- Fully skirt design suitable for automated operation
- Ideal for high-throughput systems
- Material with uniform, thin walls maximize consistent heat transfer to and from the reaction samples
- Fits standard 384-well modules and is compatible with most thermal cycler systems
- 40 μL maximum well capacity, 25 μL maximum working capacity
- DNA-free, DNase/RNase-free, Pyrogen/Endotoxin-free
- A raised rim around the wells enables secure sealing with film and safeguards against evaporation

384-Well PCR plates

PCR Tubes with Attached Flat Cap

Made of virgin polypropylene and designed for precise fit in heat blocks to optimize heat transfer. The tubes are cleanroom produced, ensuring that they are free from contaminants that could affect experimental results.

P / N	Capacity /μL	Closure Type	Color	Configuration
802001	200	Flat Cap	Clear	1000 tubes/box, 10 boxes/case
802051	500	Flat Cap	Clear	500 tubes/box, 10 boxes/case

Optical Adhesive Film

PCR Sealing Film reduces the chance of well-to-well contamination and sample evaporation when applied to a microplate. Prevent Loss of Precious Samples.

Use this optically-clear adhesive film to seal the samples into the wells of a microplate. This will reduce the possibility of cross contamination between sample wells and help ensure consistent Real-Time PCR data.

For Research Use Only. Not for use in diagnostic procedures.

Easy to Use.

Simply peel the backing away from the adhesive film and apply firmly across the top of your microplate. Stack microplates and read samples as you would normally except with less chance of sample contamination. Designed to fit on 96-well and 384-well plates.

- Features
- Pressure-sensitive adhesive provides a tight seal over every well
 - Will not interfere with sample reading
 - Press-N-Seal: Align properly to the plate, then press to seal
 - Easy to apply-will not stick to your glove

P / N	Description	Configuration
802021B02	Optical, ABI, Pressure sensitive	100 pcs/pack
802021B03	Optical, Easily simply, Pressure sensitive	100 pcs/pack

Adhesive PCR plate seals

The transparent adhesive film firmly seals the sample in the wells, reducing sample leakage, evaporation, and contamination between wells.

The adhesive film is firmly adhered to the well plate by removing the adhesive film backing and grasping the sides to align and secure the adhesive film to the well plate. Once sealed, it can be safely stacked without worrying about contamination.

- Features
- Self-adhesive, manual lamination
 - Both sides can be peeled, easy to operate
 - Easy to remove, no residue
 - No reaction with experimental samples
 - High transparency and good sealing

Adhesive PCR plate seals

P / N	Description	Configuration
802021E01	Adhesive Transparent Sealing Film, Clear, 142×80 mm	100 pcs/pack

Sealing Foils

- Features
- Good alcohol resistance and good chemical corrosion resistance
 - Easy to tear while ensuring sealing performance
 - Withstands a wide temperature range and has been tested by extreme temperature tests and long-term tests
 - The sealing surface is clean and tidy without residue
 - Strict batch management ensures product quality

Sealing Foils

Centrifuge Tubes

Conical Sterile Polypropylene Centrifuge Tubes are premium, high-quality conical tubes that are environmentally friendly, allow for increased traceability with the largest writing area on the market. Centrifuge tubes are made from high-purity resins and molded using our state-of-the-art processes. Centrifuge tubes is a safer alternative to glass without sacrificing accuracy. Centrifuge tubes feature are black-printed graduations and a large white marking spot. Sterile,DNase/RNase-free, Nonpyrogenic.

15 mL & 50 mL Centrifuge Tubes

- Black printed graduations with a large white marking spot
- Maximum RCF is 12,000 xg
- Sterile, nonpyrogenic and DNase/RNase-free
- Convenient and safe cell culture applications
- Sample preparation in microbiology and molecular biology labs
- Storage of samples and solution with larger volumes
- Preparation of master mixes and buffers

P/N	Capacity	Tube Color	Description	Configuration
801151	15 mL	Clear	Bulk, Sterile	25 tubes/pack, 20 packs/case

15 & 50 mL Amber Centrifuge Tubes

15 mL Rack Packed Centrifuge Tubes

50 mL Rack Packed Centrifuge Tubes

SnapLock Micro Centrifuge Tube

- Snap lock Microtubes have frosted cap surfaces for labeling, frosted panels on the side for writing
- Withstand up to 14,000 xg RCF
- Snap lock cap assures efficient seal
- Thin membrane in cap center allows easy access to sample by syringe needle
- DNase/RNase-free, Nonpyrogenic

P/N	Capacity	Format	Color	Configuration
801141	0.6 mL	Bulk	Clear	1000 tubes/pack, 10 packs/case

801183	2.0 mL	Low Retention, Bulk	Clear	500 tubes/pack, 10 packs/case

Centrifuge Bottles

Polypropylene (PP) centrifuge bottles are ideal for applications requiring large volume centrifugation.

Features

- High Density Polyethylene plug seal caps
- Maximum RCF of 6,000 xg
- Bottles are sterile and nonpyrogenic

P/ N	Capacity	Type	Configuration
806001	500 mL	Conical, Plug sealed cap	2 pcs/bag, 20 bags/case
806002	250 mL	Conical, Plug sealed cap	4 pcs/bag, 25 bags/case

Low Retention Micro Centrifuge Tubes

Low Retention centrifuge tubes are preferably made of virgin PP, a special process for centrifuge tubes that significantly improves sample storage efficiency and higher recovery rates. No surface coating to reduce interference with the sample. Highly transparent, the tubes come with a scale and frosted writing area for easy marking and observation of the liquid volume.

Features

- Low DNA/Protein-binding
- Good sealing, repeated opening and closing of the cap, greater reduction in evaporation
- Sterile
- DNase/RNase-free, Non PCR inhibitors, Non pyrogen
- Temperature Range: -80°C to 121°C
- Will withstand up to 14,000 xg RCF

Applications

Low Protein-binding Micro Centrifuge Tube: preparation and storage of proteins, peptides or antibodies, enzymatic reactions, storage of viruses to prevent reduction of virus titres, storage of cell suspensions.

Low DNA-binding Micro Centrifuge Tube: DNA solution dilution, DNA solution preservation, extraction and purification process of DNA sample.

P / N	Capacity	Description	Sterile	Configuration
801167	1.5 mL	Low DNA-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case
801168	1.5 mL	Low Protein-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case
801187	2.0 mL	Low DNA-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case
801188	2.0 mL	Low Protein-binding, Clear	Yes	10 pcs/bag, 10 bags/pack, 10 packs/case

Safe-Lock Micro Centrifuge Tubes

Imported high-purity polypropylene (PP) raw materials, in line with the USP Class-IV standard, does not contain heavy metal ions.

One-piece tube and cover, stable connection, can be repeatedly opened and closed without breakage. With safe-lock design, good sealing, effectively prevents the bursting of lid.

The tube has a frosted writing surface, convenient for sample marking. High transparency for clear and easy observation.

Features

- Withstand speeds up to 14,000 xg RCF
- DNase/RNase-free, Non pyrogen
- With safe-lock design
- Can be operated with one hand for efficiency

Applications

Routine as well as demanding laboratory uses, including centrifugation, heating, incubation, freezing or sample storage.

P / N	Capacity	Sterile	Radiation resistance	Configuration
801191	1.5 mL	No	No	500 pcs/pack, 10 packs/case

Screw Cap Micro Tubes

- Screw cap tubes are available in a variety of colors with a conical or self-standing bottom
 - Colored-cap versions are available
 - Manufactured from high-clarity, ultra-pure polypropylene
 - Suitable for a wide range of temperatures-from -80 °C to 120°C.
- Note: not suitable for immersion in liquid nitrogen
- Ideal for boiling applications
 - Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free
 - Maximum RCF is 20,000 xg

Optional Colors for Screw Caps

various colors of the cap are available for the free combination and matching

Cryogenic Vials

Imported polypropylene (PP) material, complies with USP Class-VI standard
Temperature range: -196°C~121°C, repeatable freeze-thaw
Large white writing area, clearer printing of scale lines
Ergonomic, smooth internal contours and residue-free sampling
DNase-free, RNase-free, Pyrogen/Endotoxin-free
High transparency for clear and easy observation.

Features

- High temperature and pressure resistance, can be repeatedly frozen and thawed
- Strong sealing to meet the safety of samples and experiments
- External/Internal rotation, various sizes available

Applications

Routine as well as demanding laboratory uses, including centrifugation, heating, incubation, freezing or sample storage.

Cryogenic vials (External-Thread)

Has a screw cap with external threads to reduce the risk of sealability

P/N	Capacity	Tube Color	Cap Color	Configuration
8230101P01	1.0 mL	Clear	Clear	50 pcs/bag, 10 bags/pack, 4 packs/case
8230301P01	1.8 mL	Clear	Clear	50 pcs/bag, 9 bags/pack, 4 packs/case
8230501P01	4.5 mL	Clear	Clear	50 pcs/bag, 6 bags/pack , 4 packs/case

Cryogenic vials (Internal-Thread)

Has a screw cap with internal threads and a silicone O-ring for tighter containment

P/N	Capacity	Tube Color	Cap Color	Configuration
8230201P01	1.0 mL	Clear	Clear	50 pcs/bag, 10 bags/pack, 4 packs/case
8230401P01	1.8 mL	Clear	Clear	50 pcs/bag, 9 bags/pack, 4 packs/case
8230601P01	4.5 mL	Clear	Clear	50 pcs/bag, 6 bags/pack , 4 packs/case

Cell Culture Products

Cell culture series are commonly applied in cell culture laboratories. CellPro has plasma surface treatment technology, more conducive to cell adherent growth. It is widely used in basic research of life science, cancer research, virus detection and diagnosis, genetic engineering, vaccine development and production and other fields.

Cell Culture Plates

Clear Multiwell Plate is comprised of clear TC-treated polystyrene. Flat bottom, with low evaporation lid, sterile. Convenient, peel-open medical-style packaging for individual product prevention.

Features

- Standard tissue culture (TC) treated
- Crystal-grade virgin polystyrene
- Flat well bottom and stackable
- Raised well rims to lower the risk of cross contamination
- Sterilized by gamma irradiation and non-pyrogenic
- Excellent optical effect
- Alphanumerical codes for well identification
- Round Well Styles with vented lids for gas exchange
- Recessed areas around wells act as a water reservoir to reduce evaporation
- Lids with notched corners for easy orientation

P/N	Capacity/well	Well count	Culture Area	Configuration
803006	2.9 mL	6	9.5 cm ²	1 pc/pack, 50 packs/case
803012	1.14 mL	12	3.8 cm ²	1 pc/pack, 50 packs/case
803024	0.57 mL	24	1.9 cm ²	1 pc/pack, 50 packs/case
803048	0.285 mL	48	0.8 cm ²	1 pc/pack, 50 packs/case
803096P01	0.2 mL	96	0.32 cm ²	1 pc/pack, 50 packs/case

96-Well Round (U) Bottom Cell Culture Plates

The cell culture plates are made of polystyrene, a transparent polymer material, and the plates are treated with CellPro's unique LACsurface surface treatment process, which forms a surface that inhibits cell adhesion and is non-toxic to cells, does not affect the growth of suspended cells, minimizes cell apposition and differentiation, reduces protein adhesion and enzyme activation.

Features

- Effectively reduces cell apposition and controls the direction of cell differentiation
- Round bottom with lid to reduce contamination and evaporation
- Non-slip design on the side, easy to hold
- Temperature range: -20°C~60°C
- DNase/RNase free
- Sterile, non-pyrogenic, non-cytotoxic

Applications

Suspension cell culture, walled cell 3D culture, cell induced differentiation

P/N	Working Volume	Description	Sterile	Configuration
C803096B-P01	0.2 mL	LACsurface Ultra-low Retention	Yes	1 pc/pack, 50 packs/case
803096B-P01	0.2 mL	TC treated	Yes	1 pc/pack, 50 packs/case

Cell Culture Flasks

Flasks are the preferred vessel for long term cultivation or large-scale expansion of cells, providing the best protection against contamination.

The ergonomic design with angled neck and wide opening allows easy access to the growth surface by pipettes or cell scrapers.

Workflow safety is combined with facilitated and ergonomic access to your cells in the Cell Culture Flasks. They are available in three sizes: T25, T75 and T175 with TC treated.

Vented caps with innovative air filter technology or plug-seal caps with arrested position to prevent undesired closing are the two closing options.

Features

- Direct surface identification on flask and cap
- Ergonomic design with a 1/3 turn to open and close the cap
- Low profile to maximize incubator space
- Volume graduations printed and molded on both sides
- Slightly angled side walls for complete viewing under a microscope
- Sterilized by gamma irradiation and nonpyrogenic
- Expansion and culture of adherent and suspension cells on TC treated or on non-treated polystyrene
- Performance of cell-based assays and microscopic analysis

P/N	Culture Area	Cap Style	Capacity	Configuration
803025	25 cm ²	Vented	50 mL	12 pcs/bag, 25 bags/case
803026	25 cm ²	Sealed	50 mL	12 pcs/bag, 25 bags/case
803075	75 cm ²	Vented	175 mL	5 pcs/bag, 18 bags/case
803076	75 cm ²	Sealed	175 mL	5 pcs/bag, 18 bags/case
803175	175 cm ²	Vented	550 mL	5 pcs/bag, 10 bags/case
803176	175 cm ²	Sealed	550 mL	5 pcs/bag, 10 bags/case

U-Shaped Cell Culture Flask

U-shaped design, improving usability while maintaining the same environment for cell growth.

Easier grip and for better access when removing or tightening the cap.

New ergonomic shape also reduces the number of corners.

Making it possible to efficiently reach the cell lawn with a cell scraper, whilst still providing optimal access with a pipette.

Features

- Clear virgin polystyrene
- Vented or Sealed cap
- Graduation on the side
- TC surface treatment
- DNase/RNase-free, non-pyrogenic
- Non-cytotoxic
- Stackable
- Sterile

P/N	Culture Area	Cap Color	Cap Style	Capacity	Configuration
813075	75 cm ²	Red	Vented	15-22.5 mL	5 pcs/bag, 18 bags/case
813150	150 cm ²	Red	Vented	30-45 mL	5 pcs/bag ,10 bags/case
813076	75 cm ²	Red	Sealed	15-22.5 mL	5 pcs/bag, 18 bags/case
813151	150 cm ²	Red	Sealed	30-45 mL	5 pcs/bag ,10 bags/case

* For Research Use Only

Cell Culture Dishes

Cell Culture dishes are available in 35 mm to 150 mm formats with TC treated surfaces

Features

- CellPro cell culture dishes were designed with a focus on improved handling and stacking performance to ensure a new level of safe and carefree usage
- Combined with outstanding and sturdy stacking, our cell culture dishes are unparalleled in their ease of transport and handling, safety and convenience
- Expansion and culture of adherent and suspension cells on TC treated
- Performance of cell-based assays and microscopic analysis

P/N	Culture Area	Surface Treatment	Configuration
803035	8 cm²	TC Treated	20 pcs/pack, 25 packs/case
803060	21 cm²	TC Treated	20 pcs/pack, 25 packs/case
803100	55 cm²	TC Treated	10 pcs/pack, 30 packs/case
803035B	8 cm²	TC Treated	20 pcs/pack, 25 packs/case
803060B	21 cm²	TC Treated	20 pcs/pack, 25 packs/case
803100B	55 cm²	TC Treated	10 pcs/pack, 30 packs/case
8030150B	145 cm²	TC Treated	10 pcs/pack, 8 packs/case

Serological Pipettes

Serological Pipettes is a great choice for daily lab work.

Serological Pipets may be used to aspirate and dispense liquids within a volume range of 0.1 mL to 50 mL. Bold, clear bidirectional graduations make it easy-to-read fluid volumes and dispensing amounts. Color-coding for easy identification of pipet sizes.

With precise and easy-to-read graduations, they are designed to quickly aspirate and dispense liquids when using mechanical or electronic pipette controllers.

Features

- Material: Ultra clear, 100% virgin polystyrene for maximum clarity
- Contaminant Free: RNase/DNase free, Human DNA free, Non-Cytotoxic, Non-Pyrogenic
- Sterility: E-Beam irradiation
- Individually wrapped pipets for reliable sterility
- Transfer of liquids
- Mixing suspensions
- Combining reagents and chemical solutions
- Transferring cells for empirical analysis or expansion
- Layering reagents for creating higher density gradients

P/N	Capacity	Code Color	Configuration
C804001	1 mL	Yellow	50 pcs/pack, 20 packs/case
C804002	2 mL	Green	50 pcs/pack, 20 packs/case

C804010	10 mL	Orange	50 pcs/pack, 4 packs/case
C804025	25 mL	Red	50 pcs/pack, 4 packs/case
C804050	50 mL	Violet	25 pcs/pack, 4 packs/case

Erlenmeyer Flasks

Single-Use PETG Erlenmeyer Flasks with Plain Bottom, ideal for suspension of cell culture, media preparation, mixing and storage. Crystal clear PETG or PC is robust and break resistant, increasing personal safety.

Features

- Sterile and single use: Reduce contamination risk
- Graduated for quick volume assessment

P/N	Capacity	Material	Cap type	Configuration

Elisa Microplates

All ELISA microplates are made out of high-quality virgin polystyrene (PS). The material is highly transparent and therefore ideally suited for optical measurements. The quality of our immunological products is constantly controlled in our quality assurance laboratory by means of ELISA.

P/N	Total Volume	Working Volume	Type	Configuration
805001P01	250 µL	75-200 µL	Clear, Undetachable	5 pcs/pack, 20 packs/case
805002P01	300 µL	75-200 µL	Clear, Detachable	5 pcs/pack, 20 packs/case
805004	300 µL	75-200 µL	Clear, Detachable	5 pcs/pack, 20 packs/case

96 Well Microplates

Microplates made with high quality black polystyrene ensure consistent and reliable results for experiments. The black microplates are specially optimized for use in automated equipment, microplate readers and liquid handling systems. The products can be used for quantitative and qualitative immunoassays, such as protein binding assays, fluorescence analysis and other experiments.

Features

- Medium/high binding power, high signal-to-noise ratio
- Reduce well-to-well cross-talk
- Have low background fluorescence and minimize light scattering
- Flat bottom plate, stackable and space-saving
- Non-slip sides for easy grip
- Certified binding uniformity/reproducibility
- DNase/RNase free, pyrogen free
- SBS-compliant microplate shape for use with standard instruments

P/N	Type	surface treatment	Well Bottom	Configuration
805005	Standard, With Cap	Medium Binding	Flat Bottom	25 pcs/box, 4 boxes/case
805003	Standard, With Cap	High Binding	Flat Bottom	25 pcs/box, 4 boxes/case

Petri Dish

Petri dishes are one of the most important products in a bacteriological laboratory. The dishes are in vented design and manufactured in high capacity automated production lines. Environmental and Water Testing, Food and Beverage Testing, Pharmaceutical Quality Control and Life Sciences. General laboratory product for bacteriology to be used by qualified personnel in a laboratory environment.

Features

- Easy stacking
- Vented for gas exchange
- Manufactured from high-grade polystyrene
- Sterile
- For single use only
- Free of DNase /RNase, Non-pyrogenic, Non-cytotoxic

*For Research Use Only.

P/N	Specification	Configuration
816100	90 mm	20 pcs/pack, 25 packs/case

96-Well Deep Well Plates

Deep well plates are used for sample collection, processing and storage. The depth of wells is increased to enlarge the volume of each well. Polypropylene (PP) offers excellent chemical resistance and can withstand temperatures down to -80 °C.

Option: pierceable sealing films, aluminum-based, self-adhesive.

Features

- Nonpyrogenic and DNase-/RNase-free
- For Research Use Only. Not for use in diagnostic procedures

P/N	Capacity	Type	Configuration
802123	2.2 mL	96-well, V-bottom, Square Well	5 pcs/bag, 10 bags/case
802124	2.2 mL	96-well, U-bottom, Square Well	5 pcs/bag, 10 bags/case
802125	2.2 mL	96-well, U-bottom, Square Well, Skirted	5 pcs/bag, 10 bags/case

96-Well Deep Well Tip Combs

Tip combs are made of polypropylene (PP) and are ideal for magnetic particle processing because of their low binding affinity for biomolecules. Their special design enables excellent recovery of magnetic beads. For Research Use Only. Not for use in diagnostic procedures.

P/N	Capacity	Configuration
802121	2.2 mL	10 pcs/pack, 10 packs/case
802121P01	2.2 mL	2 pcs/pack, 50 packs/case

Transport Tubes

Volume range from 5 mL to 10 mL, available in sterile and non sterile options.

Transport tubes offer advanced seal and extended deep cap to prevent leaking when shipping samples.

Screw Cap with skirted self standing tube with round bottom for easy sample extraction.

Rnase/Dnase, DNA, pyrogen and endotoxin free.

P/N	Capacity	Type	Configuration
8100105	5 mL	Orange Cap	2400 pcs/case
8100112	12 mL	Orange Cap	1200 pcs/case

Nasal/Throat Sampling Collectors

CellPro Nasal/Throat Sampling Collectors are flocked swabs that consists of a molded plastic applicator stick with a variable size and shape tip.

The swabs also feature a molded breakpoint that allows you to safely and easily break off the swab stick.

Soft brush-like texture of the swabs facilitates efficient dislodging of the target cells.

P/N	Capacity	Configuration
8100601	Nasal, Individually Wrapped	200 pcs/pack, 10 packs/case
8100602	Throat, Individually Wrapped	200 pcs/pack, 10 packs/case
8100604	Children, Individually Wrapped	200 pcs/pack, 10 packs/case

Sampling Collection Kits

Designed for the collection, transportation, maintenance and long-term storage of viral specimens at room temperature.

5 mL Kit

5 mL transport tube with 2 mL solution ×1
Throat Sampling Collector ×1
Biohazard bag ×1

12 mL Kit

12 mL transport tube with 3 mL solution ×1
Nasal Sampling Collector ×1
Biohazard bag ×1

P/N	Description	Configuration
8100805	5 mL Sampling Collection Kits	50 kits/box, 10 boxes/case
8100812	12 mL Sampling Collection Kits	50 kits/box, 10 boxes/case

Saliva Sampling Collectors

Simple, Reliable, Cost-efficient.

Isolation of nucleic acids from saliva has become a cost-effective and non-invasive alternative to blood or tissue for genotyping and other genetic analyses.

For best results, saliva donors should be instructed to refrain from eating, drinking, using tobacco products, or chewing gum for at least 30 minutes for best results.

Ambient temperature storage and transport.

The saliva collector is a non-invasive, painless saliva sample collection device, Contains saliva preservation fluid, which can ensure the stability of the nucleic acid in the saliva during transportation and storage at room temperature.

The saved saliva samples can be used for nucleic acid extraction and genetic testing.

The saliva collector is composed of a collection funnel, a collection tube, a saliva preservation liquid and a collection tube cover.

The collection of samples of this product is simple and convenient, the user does not need relevant professional skills, and can be easily used without complicated training.

Product Composition

Plastic parts are injection molded with medical grade PP material.

The main components of saliva preservation fluid are sodium chloride, tris hydrochloride, disodium edetate, and it does not contain toxic components such as organic solvents.

Product Features

Flexible usage scenarios: It can be used in various places such as laboratories, hospitals, airports, entries and exit ports, homes, etc.

Safe and painless: non-invasive sample collection, completely painless, highly acceptable, one-time use, reducing the risk of infection.

Convenient transportation: transportation at room temperature no need cold chain.

Efficient sample processing: the collection tube is suitable for automated batch processing to improve work efficiency.

Instructions

Do not eat, drink, smoke or chew gum within 30 minutes before collecting saliva samples

Unscrew the cover of the collection tube and install the collection funnel to the mouth of the tube. During this process, keep tube upright and do not tilt or invert it to prevent the preservation liquid from flowing out of the tube

Before spitting saliva, relax your cheeks and gently rub your cheeks for 30 seconds to spit out saliva; Keep the tube upright and spit saliva into the collection funnel. The amount of saliva collected together with the preservation liquid in the tube must reach 4 mL (non-bubbles)

After the collection is completed, unscrew the collection funnel and cover the collection tube cover. Put a label on the tube and put it in a biosafety bag.

P/N	Description	Configuration
8100860	Individually, Plastic Shell	1 kit/box, 100 boxes/case
8100861	Individually, Hard Shell	1 kit/box, 100 boxes/case

PremPette Mechanical Pipettes

Single-Channel and 8-channel Adjustable Volume Pipettes

Features

- Light weight, ergonomic, low force design
- Digital display clearly reads volume setting
- The pipettes cover volume range of 0.1 µL to 1000 µL
- Easy to calibrate and maintain with supplied tool
- Design helps avoid repetitive strain injuries
- Calibrated in accordance with ISO8655. Each pipette with individual test certificate
- The lower ection can be autoclaved

P/N	Capacity	Type	UOM
812001	0.5-10 µL	PremPette, Single-channel, Adjustable Volume	PC
812002	20-200 µL	PremPette, Single-channel, Adjustable Volume	PC
812003	100-1000 µL	PremPette, Single-channel, Adjustable Volume	PC
812004	0.5-10 µL	PremPette, 8-channel, Adjustable Volume	PC
812005	5-50 µL	PremPette, 8-channel, Adjustable Volume	PC
812006	50-300 µL	PremPette, 8-channel, adjustable Volume	PC
812013	2-20 µL	PremPette, Single-channel, Adjustable Volume	PC
812014	10-100 µL	PremPette, Single-channel, Adjustable Volume	PC
